The effects of neuroleptics :

- Nocturnal restlessness: waking up to walk
- Summit of torture, of horror
- Nocturnal urine
- Very frequent urine
- Difficulty walking
- Huge weight loss
- Loss of resistance to heat, torture, awakenings due to heat*loss of resistance to cold, fatigue, pain and kidney problems probably caused by this due to neuroleptics
- Loss of any sense of rest and well-being
- Not feeling anything as an emotion: ability to memorize, libido, appetite, thirst, imagination, intelligence, energy, vitality, reflection, sensation, motivation, desire, desire, joy, sadness.
- Destruction, torture, horror
- Cut off sleep
- Sleep becomes interrupted, poor quality and shorter
- Destruction, torture, horror
- Restless legs syndrome: impatience
- Nightmares
- Torments
- A feeling of a dark world due to neuroleptics
- Mental torture, physical torture, destruction, horror
- Cut the appetite
- Anorexia or bulimia
- Anorexia when everything is cut off
- Bulimia when we lose all pleasure, we eat
- Cut libido
- Cut off all hormones
- Mental and physical torture
- Disturbance of the neurohormonal system
- Tongue and jaw deformity (facial dyskinesia), torture
- Time passes slowly and heavily, torture
- Very painful tearing of the eyes, cracked lips
- Cut out all meals (sleep, restless legs, mental torture, the slowness of time, nightmares, torment)
- Slowing down in walking and movements, torture
- Cut or block dopamine, serotonin, melatonin, adrenaline, torture
- Disturbance of the neurohormonal system

- They claim to "cure" non-existent and unreal illnesses but in truth they cause real illnesses and physical and mental destruction and an unnatural, unnormal, unhealthy state of health.

- The definition of illness is a state in which a person feels some pain and is in an unusual state in relation to their body: this is what neuroleptics do.
  Unlike what they call “disease” which is non-existent and unreal and is a habitual and healthy and normal and natural state in which the person finds himself.

  The small problems or unreal problems that these people pretend to cure with real problems and real, huge, horrible and destructive problems and torture
  Anorexia, due to a loss of appetite
  Depression or the little unhappiness caused by great torments and a dark world
  Mental instability due to a total and destructive disruption of the neuro-hormonal system and the mind of the person
  Ideas??? suicidal??? unreal or non-existent” by a dark world and physical and mental torment and torture???
  QUESTION???
- Small unreal problems at the social level due to a total loss of motivation, desire and energy and real capacity for integration
  NONSENSE, ANYTHING
- Small problems at the non-existent and unreal emotional level due to a real physical and total disruption of the neurohormonal system and its destruction (which is the source and driving force of emotions)
- “Unreal and non-existent disease caused by destruction of the brain
- Pretending that “denying illness is one more symptom” of “unreal, non-existent illness” through “care” that is destructive, torture, true and real illness
- Pseudo-scientific theories which are
- ANYTHING
- NONSENSE
- AGAINST THE HUMAN PERSON
- LIES OF DOCTORS AND LABS
- RISPERDAL is a hyper destructive molecule

- ABILIFY is a gentler and more moderate molecule. Lie. It is almost as destructive at 95% and not 50% of the side effects.
- When the medication doesn't work, change to another like ABILIFY (or other)
- LIE, since they have the same effect and are all destructive
- “side effects” LIES, since its primary effect is to destroy the person and their neuro-hormonal system
- The most "secondary" effect is akathisia = motor impatience = legs without rest, is part of the primary effect which is the destruction of the nervous system which causes these impatience in the legs, the same for facial dyskinesia, deformation of the tongue and jaw (due to the drying out of hormones) the same for tearing and
- - “The patient” is in denial of the “disease” LIE
  Already demonstrated since “the disease” is unreal and non-existent while, on the other hand, the problems caused by neuroleptics are real , true , destructive , horrible .
- “Mental ill” or “mental illness” LIES. Already demonstrated since the person is in a healthy, natural, livable initial state, without physical pain, or non-existent and unreal problems or "small problems", since is in a destructive, painful, tormented, dark state, madness, nightmares, torture
- “The person does not eat” LIE, already demonstrated the person had “small or even non-existent and unreal appetite problems.
  Then the person has
  1) No pleasure therefore no pleasure in drinking or eating NON SENSE
     ANYTHING
     DESTRUCTION
     ??? QUESTION???
  2) The person has difficulty eating with neuroleptics REAL ANOREXIA. ditto???
  3) Anorexia or bulimia
     Anorexia + bulimia
     Healthy initial state
     State to unhealthy extremes with neuroleptics Idem

  4) State of physical and mental torture, dark and tormented state which obviously gives neither the appetite nor the desire to eat

- The primary effect of neuroleptics is to cut off all emotion, sensation, pleasure, desire, motivation, which is already horrible torture and destruction.
- And for this, neuroleptics “block” or cut off all hormones such as dopamine, serotonin… Idem
- So, they will cut off sleep hormones (or melatonin) Idem (torture, destruction) which has the effect of cutting off sleep and disrupting and diminishing it. HUGE TORTURE. HORRIBLE.
- By the same method, they cut off rest to the legs and body. “Side effects” linked to the first effect ditto
  HUGE
- Deformity of the nervous system, leading to jaw dyskinesia
- This “side” effect is directly linked to the primary effect
- “Hormone blocking and cutting
- Loss of libido
- By the same method, we can say that they dry out the body
- Loss of the sensation of thirst. Horrible and destructive.
- By the same method, it causes very painful tearing of the eyes.
- By the same method, it causes chapped lips
- Same “secondary” effect directly linked to the effect of the first

  These Neuroleptics or “medications” help you rest = LIE demonstrated: 1) loss of sleep
  2) restless legs
  3) loss of pleasure
  4) loss of sensation
  5) mental torture
  6) physical torture

- “Side effect” = LIE. These are the primary effects
  The primary effect is to cut off all emotion and sensation, which is already torture and destruction 1)
  This effect causes another destructive effect which causes another destructive effect and so on. 2)
  These effects are directly and totally and completely part of the very first effect (cutting off emotions and sensations)3)
  Rap: “side” effect = FALSE
- If not quite simply, it is because the desired effect is destruction, torture, horror, terror on the person = the true primary effect 4)
- There is no need to talk about side effects 5)

- Already cutting off all emotion and sensation is destruction, torture, horror 6) 1+5=6
- “Rest” = Lie. FAKE

- The “care will return the person to a normal life = Lie. FAKE
- Already demonstrated since neuroleptics will make the person lose their vitality, their energy, their capacity for reflection and memory, motivation, desire.
    - The person is not well (before treatment) = Lie. FAKE
        1) The person had relative or unreal or non-existent “small problems” which were exaggerated.
           It is natural to feel happy about something positive and sad about something negative, which is a healthy and natural state.
           Neuroleptics aim to make the person “lobotomized”, totally stupid, who feels nothing, which is really REAL ABSOLUTE EVIL REAL EVIL + torture + destruction. So we can say that “I was doing well before the Neuroleptics (or at least on this point.
        2) The person had “certain problems” concerning their life which are external, relative, real (es: personal, work, studies, immigration, etc.) for which it is totally normal and natural to feel a need to resolve these problems. These relative and “small” external problems are the “not going well 1) “or small” 2 internal problems. This is a healthy, natural and normal state.
        3) With Neuroleptics, the person is really and truly not doing well internally and externally because of the real and real health problems caused by the NEUROLEPTICS (torture, suffering, destruction, loss of sensation)
        4) 3) The problems “exaggerated by “doctors” are theoretical, unreal, relative and non-existent and small”.
           Note: theoretical: In the pseudo-scientific ideology of psychiatry which is total nonsense and complete rubbish.
- The minimal problems caused by doctors by their NEUROLEPTICS are real, true, total, absolute, "huge", "big", destructive, horrible, corporeal, celebrable, neuro-hormonal, real "health problems

5) I WAS WELL before NEUROLEPTICS
6) To put it more simply and easily “With NEUROLEPTICS”, it’s worse”

- “The person had dark or suicidal thoughts” (before NEUROLEPTICS) Lie. FAKE. BIG LIE. Real Lie.

1) As already said, before the "care " the person had relative, "small", unreal or non-existent "problems" for which it is normal and natural and healthy to experience positive or negative emotions and sensations in the face of them.

- But before NEUROLEPTIC, the person is in total evil, a dark world, a world of nightmares, a violent void
- Forced injection of NEUROLEPTIC is worse than murder.
- It is the height of barbarism, horror, criminality and gratuitous violence.

2) The “ideas” exaggerated by doctors (before “care”) are therefore unreal, non-existent, false, exaggerated, relative, “small.

- Example: in the healthy and natural state of the person, it is completely normal, natural to experience emotions or sensations either positive or negative and therefore to interact we can have ideas and thoughts relating to the sensation. If we are sad, it does not mean that we are suicidal. It is completely healthy, natural and normal to be sad.
- Their theories and ideologies are TOTAL NONSENSE and TRUE ANYTHING.

Let's add to this, the nonsense and the nonsense of "disease" of their pseudo-scientific theories and ideologies ex 1: we can say "oh, shit" that does not mean that we want fecal matter.
Ex 2: children can have fun saying “go away…” this does not mean that he expects such and such from him.
Ideas are ideas
Thoughts are thoughts
Words are words
Desires are desires
Thoughts are real thoughts
Actions are actions
Intentions of ideas intention of actions
Real thoughts real thoughts

- When the effect of NEUROLEPTIC is the emotional and sensational void, the destruction, the torture, the nightmarish

and dark world of NEUROLEPTIC. Can we deduce the obvious?? QUESTION? EXCLAMATION!! HORROR

2) Faced with the questionnaire worthy of guestapo/after a long wait at the CPOA + a dismal atmosphere in the hospital), the nurse will focus on this famous question: “do you have any ideas…. ???

The person will answer “A”

1) What the person said "A" is not a "yes" nor "I have ideas...", he expressed Tel according to a healthy and natural and normal state without knowing that this service will react in this inhuman way
2) FIRST OF ALL, “A” is not “s**** ideas”, that of appearance and letter and what the person said the 1st time A1, and the 2nd time A2

- “A1” or “A23 in the form and in the letter is not “s** ideas” that of 1 and 2

2) As already said, there is the questionnaire, the wait, the atmosphere, the relentlessness of the nurse on this question which has no reason to be.

- The person in his natural and normal state interacts with such a situation and could express such in the face of such a situation.
- As already said, there are simple ideas in the air, simple words in the air, which are neither serious nor real.
- What the person felt or thought or expressed or said; A does not mean “s** ideas”

  “A” in the background does not mean “s*** ideas”

  3) “A”; “A1” or “A2” does not mean “s** ideas, neither in substance nor in form, neither literally nor in meaning.

  4) NONSENSE

  ANYTHING

  Theories

  Almost Nazi ideology
- The person has “an illness and “symptoms” = Lies FALSE

1) These are false theories of complete nonsense, total nonsense. There is no illness. Ex: “He is wearing a blue jacket”: Illness
2) “he is thin”: Illness
3) “He’s fat”: Illness
4) “He is shy”: Illness
5) “He talks a lot”: Illness
6) “He wears a red jacket”: Illness
7) “He wears a cap” Illness

8) “There is a 50 cent coin under his shoe”: Illness
9) " There is nothing ". Disease
10) “He met a gentleman, said hello to him, then ate a cake, then played ball” Illness... etc.
11) The greatest ANYTHING. NON-SENSE

This is not medicine!!!

And, with that, they make everything like theories, with “symptoms”, “diseases” and they give destructive, dark and torturous “medicines”.

NON-SENSE

ANYTHING

It's not medicine

3) The symptoms mentioned are contradictory and make no sense and are ANYTHING. Ex: “s**t ideas”, “delusional ideas”, “communication problems”, “think softly”, “slow down”, “eyes down”
4) 3) (by nature contradictory, that there are symptoms: interior and exterior, bodily and mental linked to the person and contextual)

(In short, the contradictory nature of the symptoms is a small parenthesis to support the nonsense and nonsense of their pseudo-scientific theories)

“S*** ideas” or “symptom = Anything.” NONSENSE

“S*** ideas”, non-existent, there is no

“Delusions” “symptoms” “disease” = NON-SENSE, ANYTHING

- It is nonsense to say that ideas are “delusional” and “symptoms of illness”
- What are delusions
- What right do they have to judge a person's ideas?
- NONSENSE, ANYTHING
- “The particularities or differences are “symptoms, illness” = CRIME MORAL RACISM BARBARISM HORROR NONSENSE
- ANYTHING Pseudo-scientific theory
- It's not medicine
- These peculiarities or "communication problems" are unreal, non-existent, small and relative and external problems and in relation to others that are no problem for the person

- Calling them “symptom” or “disease” is *jahl* ignorance (mentality of dark times), moral crime and racism and barbarity towards the person.
- “The person does not look like others or “the person does not conform socially”: “Illness” = CRIME=RACISM=BARBARIUS .
- NEUROLEPTICS, on the other hand, cause real, bodily, physical and even mental problems.
- “Communication problems” pose no problem for the person
- Note: NEUROLEPTICS cause the person to lose their ability to interact, and even their real abilities to communicate and adapt.
- “The slowdown” they talk about is unreal, non-existent or it's just “the person doesn't look like other people and doesn't conform” in their criminal and imaginary, ignorant and racist and barbaric vision.
- The person had all his vitality, his energy, his motivation, his sensations before the NEUROLEPTICS
- It was after the NEUROLEPTICS that the person walked slowly and was really slowing down in his movements. The person was in pain and had difficulty and physical suffering to do anything with NEURLEPTICS. The person was stupefied, lobotomized, legumised by NEUROLEPTICS.
- “Slowing down” (before NEUROLEPTICS) = LIES. BARBARISM = FALSE

“Communication problem” Illness = RACIST IDEAS
BARBARIAN IDEAS
CRIMES
FALSE LIE

“Particularities”, or “Differences” Illness = same
The more we stop the “medication”, the better we get
So “the person is not doing well” / before the NEUROLEPTIC + FALSE LIE
“the person has an illness”
The same person FALSE LIE
If the person has problems after NEUROLEPTIUES or after stopping them, it is because of the “illness” = FALSE LIE

The height of cynicism, nonsense and nonsense: A trainee “doctor” Dr. Myriam ZARZOUR said “It’s her illness” (speaking of restless legs syndrome) which is the unhealthy effect of neuroleptics the most obvious and apparent. NO LOGIC CYNISM NONSENSE-SENSE, ANYTHING

After NEUROLEPTICS, there are:

A real and beneficial improvement which is directly linked to the beneficial cessation of NEUROLEPTICs.

Some unhealthy effects at the start of stopping due to the harsh, persistent and violent destructive effect of NEUROLEPTICS and the difficult and violent withdrawal due to the disruption of the nervous system by NEUROLEPTICS.

The effects remain long after stopping NEUROLEPTICS

Some of the damage and destructive effects that remain. Permanent, irreversible effect desired by these barbaric criminals who want to destroy and torture and cause suffering and therefore who want it definitive, permanent and irreversible.

Torture, suffering, turning, destruction with RISPERDAL or with a maximum and infernal dose: maximum impatience, nocturnal impatience, very violent emptiness. 100%

With ABILIFY and dose reduced. It is less violent but the effect of NEUROLEPTICS remains complete and total: impatience, sleep, weak and broken, emptiness remains total: torture 80% around April 2019

A month and a half after stopping: the person feels a little better: end of impatience, less torture and torment, better sleep and better libido (“small”) (“less” (but not completely blocked) torture 50 %

The more we stop taking NEUROLEPTICS, the better we get

3 and a half months after stopping: return of sensations, better sleep, and better libido, more “liveable”, much less torture and emptiness and torment, much better torture at 25% towards the end of August 2019. The person will very much better, since then but everything is diminished “(sensations, libido, sleep) with an empty cunt certainly less violent and torments, torture, suffering, dark world, less violent.

When taking NEUROLEPTICS, the effect and the horrible sensation are so violent, harsh and persistent that we already think of permanent and irreversible destruction.

CRIMINALS

The irreversible effect exists (nuance)

Even if the torture, the torments, the nightmare world are much less violent, the motor impatience goes away, the maximum effect as well as the full effect goes away)
There is :

- Sensations, sleep, rest which are diminished
- There remains a destruction of 25% which is irreversible
- There is still some torture, torment, dark world and nightmare 5%
- The more we stop taking NEUROLEPTIC, the better we get = EVIDENCE
  Everything I say is obvious and should be obvious. But these criminals have succeeded in imposing their cynicism, their lies and their false theories, and their false medicines.
  These criminals tire me out by demonstrating evidence in the world where they have succeeded in imposing their corruption and barbarity: (people are stupid and cynical)
  1) There is no illness
  2) 2) it is NONSENSE. BULLSHIT

Pseudo-scientific and false theories. It's not medicine. Formula repeated many times.

Reminder of the obvious3) the "problems" these criminals talk about are unreal, non-existent, relative, "small", pose no problem to the person, false exaggerated by these criminals, lies, nonsense, anything

3) The problems caused by NEUROLEPTICS are real, real, present a real problem for the person, HUGE, HORRIBLE, destructive, torture
4) Very repeated formula AN OBVIOUS
5) 5) NEUROLEPTICS are torture: nocturnal impatience, cutting off sleep and weakening it and interrupting it, horrible and violent emotional and sensational void, torment, mental torture, world seems nightmarish
6) NEUROLEPTICS are destruction: torture, the same effects which are cited in 5), loss of pleasure and desire and sensation and emotion and motivation, the irreversible effect, the denial of rights, cynicism u system, targeting the person

for "peculiarities" which are beautiful and which they consider as "disease", destruction and torture when we have done nothing wrong, manipulation and lies and disinformation and fraudulent methods used by these criminals (in hospital psychiatry Dr CHAMI and even in free psychiatry Dr Maria MARTINEZ
The more we stop taking NEUROLEPTICS, the better we get
Note: ABILIFY 5 mg causes impatience , which proves that even the very small dose of NEUROLEPTIC has serious and destructive effects

ABILIFY is softer and partially blocks = LIES. FAKE

NEUROLEPTICS stop gradually, perhaps a lie and FALSE and without reason.

This concerns other products, e.g.: anti-depressants

- NEUROLEPTICS are so destructive that they must be stopped as soon as possible
- We can stop them suddenly 1) with experience 2) advice from a great psychiatrist 3) It is known that we can stop them suddenly.

If there are adverse effects or withdrawal, I think they will be inevitable and will be worse if we stop later, we take more for the "gradual" stop.

I recommend stopping suddenly

Lies that allow them to make money

“A” means “s*** ideas” = FALSE LIE

“looking “sad” or “poor” means “s*** ideas” = FALSE LIE

“don’t eat” means “s*** ideas” = FALSE LIE

As already said, what they call "he doesn't eat" or what the person meant by "I don't eat" are in reality relative, small, unreal, non-existent false and exaggerated "problems".

- The person said “B”
- “B” means neither “s** ideas” nor “anorexia”
- “B” means a relatively and insignificantly not very ideal eating rhythm
- Ex: 1 meal per day (but this meal is nutritious)
- Ex1: eat a lot of biscuits and cakes
- Ex3: eat “small” dishes or real” dishes.
- On the other hand, NEUROLEPTICS have caused real anorexia, loss of desire and pleasure in eating, loss of appetite and its destruction.
- And likewise the loss of the desire and the pleasure of drinking, of the feeling of thirst
- Which is very dangerous and deadly
- * “sadness” or “depression”, “it’s “sick ideas**3
- False lie crazy exaggeration
- Exaggerationbarbaric
- Corrupt Exaggeration
- False Exaggeration

As already said, sadness is part of a natural, healthy and normal state (which is an obvious fact that these cynical corrupt criminals deny)

On the other hand, the NL are absolute evil, absolute darkness, destruction, torture….

The word “depression” or “depressed” is a “new and invented and theoretical and pseudo-scientific and “soft” term; Otherwise, in the other case, it means relative "problems", unreal, small, non-existent, not serious, not dangerous, "soft" barbarically exaggerated and corrupted, "psychological"

On the other hand, the NL are total and absolute destruction and suffering and torment and evil.

Note: Let's look at this hypocritical contradiction: they claim to "help" and exaggerate "depression", but they are cynical and minimize the torture and destructive effect of neuroleptics.

“they are “helping” = FALSE. LIE

“more” (problem” relative, unreal, small by destruction, torture, real and total torment

“the sick “suffer” from the “disease” = FALSE. LIE

1) There is no such thing as “disease”. These are corrupt and false theories that make no sense.
2) In the initial state, the “pluses” are relative, unreal, non-existent and insignificant and “small”
3) With the NL, there are physical, real, health problems, destruction, torture, physical and mental, dark and nightmarish
4) The hypocritical contradiction: they exaggerate the “smallest” and minimize torture and destruction
   - “they stabilize” FALSE LIE
     -They destroy and destabilize the neuro-hormonal system and the person

* “madness” mentally ill or crazy = FALSE LIE

It is the NL that makes you crazy and sick and destroys the neuro-hormonal system

- NL destroys the body and the brain and puts the person in a state that is unnatural and painful, which corresponds to a real illness
- On the other hand, the person without the NL is in a healthy, livable, natural state without this torture, and these torments and these unhealthy effects caused by the NL.
- “such” or “such” is reason for hospitalization without consent” = CRIME
  1) First of all, by what right do they put the person without their consent?
     They do not have the right !!
     They should not interfere or question. It is an injustice and a crime and barbarity.
     Everyone has rights
  2) “such and such” is the reason for hospitalization without consent
     This is nonsense
     Bullshit
     From the LIE
  3) This “such” and “such” is already FALSE and LIE
  4) All theories and “disease” are false
  5) Conclusions:

They base themselves on something false (3) that they misunderstood about the person, and on their false pseudo-scientific, false theories which make no sense 4) and that they put a link of NO -SENSE and ANYTHING 2) and already what right do they allow themselves:

a) To intern and hospitalize the person without consent
b) To give him “medication” by force
c) These drugs are a poison, a torture, a destruction, a horror, a crime.

NO ONE has the right to do this to others.

These criminals abuse the prerogatives that the law allows them without “justice” or the State doing anything.

Complicity of the State and “justice”.

The lying, cynical and corrupt approach of ruined psychiatrists:

- If we talk about such a criminal effect of these corrupt people, they will use as a card: “But he was not doing well (talk about before the “care” and the NL = FALSE, LIE

1) already, what right do they have to do this? a) hospitalization without consent

- B) force to take the NL
- C) the NL torture and horrify and terrorize and destroy

2)What is the connection? What is the link ?

ANYTHING
NONSENSE
CYNICISM

3) “The person was not well”
FALSE, LIE
a) As already said, the person was in a natural, healthy, healthy state, insignificant compared to that of NL, unreal and non-existent
b) With NL, the person is in the torture, destruction, turmoil, nightmarish and dark atmosphere of the NL effect
c) To make it simpler

C1 “I was doing well before the NL”

C2 “ maybe I had “little” problems or I was “a little” not well. But with the NL, I'm really and truly not well and extremely not well. It's incomparable compared to before the NL

C 3 for simpler: it's worse with the NL

In an incomparable way;

NL= torture, destruction, atmosphere of nightmare and suffering and torment.

C4 “perhaps I had “small” problems, but these are not what the “doctors” who understand nothing about my story and who do not know my life talk about

C5) these “doctors” are in a non-constructive and destructive irrational illogic: “it’s not okay, I’m destroying and changing for the worse” without forgetting that:

Note 1: They did this by force, without consent and imposed it on the person

Note 2 “it’s not okay” FALSE. LIE. ANYTHING. NONSENSE

Already demonstrated and explained

-they did not understand (c)

- problems relating to destruction c1, c2, c3)

The two major cynical illogical approaches of “doctors” in lying and cynical argumentation

Approach 1: the one already mentioned at the beginning of the paragraph. If we talk about their damage, they use the “he wasn’t doing well before” card.

Approach 2: “the illogical, irrational, deconstructive and destructive approach. “It’s not okay, I’m destroying and changing for the worse.”

First of all, what’s the “he’s not doing well before”???

1) Already they impose on me their hospitalization, their "care", their "medications", their lies and their cynicism concerning their false and pseudo-scientific

ideology, their lies and cynicism concerning the "disease", their lies and their cynicism concerning me. concerned person

2) What is the report, ANYTHING. NONSENSE
3) No, I'm fine and I don't need their "care" and their poison torture destruction that they call medicine
4) At the beginning, it was relative “problems”, unreal, non-existent, small, I was in a healthy, natural state
5) With the NL, it's absolute evil, torture, destruction, a dark and nightmarish atmosphere. This is where I am really and truly not doing well.
6) They didn’t understand what “I’m not well” means. They didn't understand anything about my story and don't know my life.
7) And at all levels, psychological, mental, appetite, communication, vitality, no s*** ideas, no “illness”
8) Their theories are false, lying, pseudo-scientific, NONSENSE, ANYTHING, CRIME

- I had to repeat information that is obvious to me and that I don't have to make as much effort to demonstrate, prove and even repeat several times.
- It is so much the cynicism, the lies, the irrationality of their theories, the violence of their rape on the human person, their pseudo-scientific theories which impose themselves, their lying cynical argument which wins and imposes itself, their negation rights and the human person, their barbaric racism, their barbaric lies, their barbaric rape are so harsh, persistent, violent, tenacious and impose themselves in a world corrupted in their image and ignorant in their image, cynical and mendacious in their image. image and to a State and a system and “justice” complicit in their crime.
- According to them, a person who has “an illness is a person who needs “medication” the most. But we notice that they judged “sick” reacted more poorly to this poison “medicine” than other people classified as “sick” or not. Despite the fact that this person is young and healthy, and even that his body has a better capacity for recovery and regeneration against the NL poison.

  This person therefore lives worse than others and adapts worse than others.

We can deduce that the NL does not suit him. So this person doesn't need NL.
Note: we change treatment = LIE. FAKE. FRAUD
Because they all have the same effect. And even ABILIFY considered as a “partial blocker” or more “soft” is already very destructive and the person does not adapt to BILIFY and even less to RISPERDAL. The person reacts badly
The correctors = Lies, FALSE, FRAUD. It's like "changing" treatment, it's like the cynical and corrupt expression of these criminals
These correctors will cause other “undesirable” or “side” unhealthy effects.
They will call on other proofreaders and so on. Corrupt industry that makes money through their unhealthy poisons.
Correctors have no effectiveness e.g. that of stools
First of all, by what right? We shouldn't even take the first poison and then talk about "correctors"
The NL does not suit him. He doesn't need NL.
This person is not “sick”
The diagnosis is wrong.
Their theories are already false, ANYWAY. NONSENSE, and that there is no "disease" and that NL is torture and destruction for any person.
NL are neither “sedatives”, nor “sleeping pills”, nor “antidepressants”, nor “medications”
People, out of ignorance + a lie from these criminals, call these “medicines” sedatives. It's wrong. They disturb, destroy and make the person suffer and bring the person into a gloomy and horrible and nightmarish atmosphere.
This poison prevents sleep.
They are not “sedatives”, they disrupt and destroy the neuro-hormonal system.
These are not “sedatives”, they are simply torture, horror, destruction.
The words “torture”, “horror”, “nightmare”, destruction are very, very, very weak to describe the effect of the NL
The words “criminals” corrupt, “barbarians” are very very weak to qualify these corrupt criminal barbarians.
It is beyond all torture, destruction, murder, horror, nightmare, barbarity, crime, racism, corruption.
When you compare it to torture, the NL is much worse
1) The torture lasts for a while, while the NL lasts for a while

2) Worse still, NL are permanent and irreversible.
3) NL screws up and disrupts the entire metabolism of the human being, which torture does not do.
4) NL brings out a horrible and gloomy and nightmarish atmosphere, which torture does not
   Same thing regarding the fact that the NL are beyond all destruction, it does not stop at destruction but goes so far as to make the person suffer in an atrocious way and torture in an atrocious way and he living a real nightmare. And it's even beyond that and it's small words compared to what the NL does.

   The person does not have the conscience to consent or not to hospitalization = FALSE. LIE. NONSENSE. ANYTHING

1) The person is conscious to decide whether to be hospitalized.
   There is no “Illness”; it's wrong ; these are false pseudo-scientific theories which have neither tail nor head
2) Hospitalization without consent occurs in total denial of human rights.
   No one has the right to forcibly intern another or to make them take medication or to give them destructive neuroleptics which are torture and horror and nightmare.
3) This hospitalization is against the interests of the person; the NL are destructive, torture and horror; This destroys all legitimacy of psychiatry and hospitalizations without consent.
   Already it is done against the freedom of the person and his will.
4) It is with NL that the person loses all will, ability to act, to think, to decide and to have independence and management of their life.
   It is with NL that the person is “mentally unconscious”

   On the other hand, without the NL, the person is in a healthy, natural and normal state.

5) Against the wishes of the parents “against the law”

“the person is dangerous to themselves or others” = FALSE, LIES, NONSENSE, ANYTHING.

1) This is FALSE, without the NL the person is in a healthy, natural and normal state. The person is even harmless, introverted, kind, shy, concerned about his health. It's complete nonsense to call it dangerous.
2) It is with NL that the neuro-hormonal system is disrupted and disrupted and the person is destabilized.
3) On top of that, the NL destroys and tortures and horrifies the person
4) Already, everyone has the right to a fair trial. No one has the right to forcibly intern, to forcibly give medicines, harmful and destructive substances and torture under the pretext “that the person is dangerous”
   Note: most people in psychiatry are far from being "dangerous" and even that is not a reason
   “They don’t do anything and when they decide on hospitalization without consent, they ring the bell” = FALSE

   1) It's done in an arbitrary way. It's an intern LYNA CHAMI who decides this even though she only spoke for a few minutes. Then, the other service will follow the same decision then which is only discussed with me for a few minutes. Is the judge of liberty not checking anything, he is only following the “medical” decision
   2) There is no “disease”, they are pseudo-scientific theories that make no sense and nonsense.
   3) There is no such thing as “disease”. And this, according to the expertise of great psychiatrists who took the time to properly diagnose the person in a caring and responsible manner.
   4) There is no “disease” reasoning by the harm of drugs on the person
   5) There is no "illness" reasoning by the definition of illness = unnatural state in which the person is and which is painful and/or which is an anomaly or dysfunction in the body of the person which corresponds to the effect of NL
      Without the NL, we are in a healthy state, in good health, in good shape, without disease so there is no “disease”
   6) There is no “disease.” It is the NL that causes the person to lose their ability to act, to think, to decide, to lose consciousness and will...

“denying the disease is the symptom” = FALSE, MSG, VIOLENCE, BARBARISM, NONSENSE 2) 3) 4) 5) from the previous chapter

“judge of freedoms” = LIES, nonsense, formality

This judge of freedoms follows the “medical” decision in 90% of cases

RQ: it seems that the hospital deliberately caused the summons letter to arrive late at my mother's home

Conclusions:

1) The list of NL effects is endless and even indestrictible
2) It was morally and mentally tiring to try to break down the so many lies and false arguments of these cynical criminals. They have lots of disgusting tricks up their sleeves
3) The problems that the “doctors” claim to “cure” (from under the NL when there was none) were caused by them with the NL. Ex: before the NL, I ate really well more or less.

   With the NL, I'm really difficult to eat

   Before the NL, I'm more or less well

   With the NL, I'm really not doing well

   And this in an incomparable way; we do not compare “more relative”, small, unreal, non-existent compared to total destruction, torture, horror and torment.
4) To make it simpler:

- Before the NL I was eating and I was fine
- It's with the NL that I wasn't eating and I'm not doing well

“concentration disorder as a symptom” = FALSE

1) I was in a healthy state where I had all my ability to concentrate
2) On the other hand, with the NL, I lost all ability to concentrate
3) It was just talk in the air, but I didn't have the ability to concentrate and study.
4) It was relative, insignificant, unreal, “small” whereas with the NL it was total destruction…
5) “the law protects people” = FALSE
6) “judge of freedoms” LIE, formality

   Same arguments cited in paragraph p 44, 45, arbitrary, falsity of their theories, formality of the judge of freedoms

7) These criminals feel protected by the law and “justice” and think they have good lawyers. And the victims do not have confidence in "justice" and feel that it is inadmissible and that these criminals/hospital+"doctors"+labs are protected

The nonsense and crime of hospitals and neuroleptics:

1) Locking up a person and depriving them of their liberty even though they have done nothing wrong
2) Lock him up against his will and against his will
3) Imposing something on him against his will and against his will without giving him the freedom to choose
4) Forcing him to take “medication” against his will and against his will
5) These drugs are harmful neuroleptics
6) These neuroleptics are destruction, torture, horror, nightmare, unhealthy, violent

7) In addition to their short-term damage, neuroleptics cause medium-term damage
8) Neuroleptics cause long-term damage.

All this to a person who has done nothing wrong. It's unfair and illegitimate

Even if a person does something, that is no reason to do something so horrible, inhumane, barbaric, disproportionate, unjust and even incomparable, extreme, horrible, beyond any norm.

Imprisoning a person without reason, without motive, illegitimately, unjustly, on an arbitrary decision by a mediocre, incompetent and indifferent and malicious person who botches and this in a few minutes if not in a few seconds

Imprisoning a person against their will, according to pseudo-scientific theories that are unreal and even beyond the pseudo-scientific and the unreal and which make no sense and which are nonsense without tail or head.

Imprisoning a person against their will, equating a so-called “psychological” problem with a real danger for the person

This so-called “psychological” problem is not a real danger for the person and far from it and it has nothing to do with it and it is ANYTHING. NONSENSE.

Force yourself on the person and interfere in their life and their own affairs and problems and thus impose things on them against their will (note: this alone is a real danger for the person)

Claiming in the most irrational and senseless way to "help" the person or "cure" or whatever, and based on the fact that something is a real danger to the person when in reality, there is nothing this danger, and thus impose things on him against his will.

The things imposed on the person have nothing to do with their problems (whether they are real and the real problem experienced by the person or the one claimed by the criminals). What does locking someone up against their will have to do with their well-being? What is the relationship between neuroleptics and one’s well-being?

In fact, locking up a person against their will or imposing something on them against their will can only be a source of discomfort since experienced as a violation: this is obvious. So what can we say when

this violation is at the level of the body, the brain and the neuro-hormonal system of the person? This is beyond any violation!

Neuroleptics are dopamine blockers. The main effect of neuroleptics is to block dopamine, the hormone of joy, well-being, motivation, excitement, pleasure, vigor... There, we are in a senseless, cynical contradiction, without a tail. neither head nor criminal and barbaric on the part of these criminals. NONSENSE. ANYTHING. CRIME.BARBARIUS

Neuroleptics have the effect of cutting off all pleasure, sensation, emotion, receptivity, consciousness, intelligence, vigor

Neuroleptics cut off sleep, interrupt it, diminish it, reduce it.

Neuroleptics cause the phenomenon of impatience or akathisia or restless legs syndrome.

Neuroleptics cause external and horrible physical discomfort and mental discomfort beyond measure.

Neuroleptics cause a horrible nightmarish emptiness, extreme destructive, incomparable, beyond all measure and comparison and description.

Neuroleptics torture the person

Neuroleptics destroy the person

Neuroleptics cause harm and suffering beyond all comparison, measure and which are extreme, horrible, destruction torture

Neuroleptics cause damage at the physiological, biological and bodily levels

Neuroleptics harm your health.

There is a contradiction: they assume that the person has a “problem” or “is not doing well”.

The harm caused by the hospital is real, true, extreme, horrible, destruction, torture, beyond all comparison and/or measure.

On the other hand, the “problem” or “the person is not doing well on which they based their abusive hospitalization does not exist, is unreal, is not true, otherwise relative, minimal, “small”, liveable with and adjustable. In short, this problem is non-existent in all cases.

Contradiction of NONSENSE. ANYTHING EXTREME CYNISM/ and beyond. CRIME.VIOLATION. LIE.BARBARIUS

What they did was this. Someone who is fine and has nothing, they said "he's not fine" and based on that and destroyed him and tortured him and made him really and truly not fine and in an incomparable, horrible, extreme, destructive, torture way.

NONSENSE. ANYTHING EXTREME CYNISM/ and beyond. CRIME.VIOLATION. LIE.BARBARIE, an approach serving the pharmaceutical labs which sell neuroleptics and impose them.

Same, regarding “the person is not eating”

Neuroleptics suppress the desire to eat, the appetite, and make eating difficult and a chore

The same goes for “the person is not sleeping”, neuroleptics cut off sleep, destroy it…

The same goes for “disease

The same goes for “suicidal thoughts”. He has no suicidal thoughts. Neuroleptics cause suicidal ideation. This is obvious when neuroleptics cut dopamine, torture, destroy, enter a horrible, nightmarish void.

Imposing on the person the racist and criminal idea that they have “an illness” and this according to their insane and headless theories

This is a crime in itself

Imposing on the person the fact that their particularities and characteristics and those of their person are “symptoms” and/or “disease” CRIME. BARBARITY. RACISM. DESTRUCTION.

Impose this moral violence on the person: denying the illness is one more symptom of the illness

Imprisoning the person against their will is evil + imposing something on them against their will is evil + imposing their insane, criminal and violent theories on them is evil + the neuroleptics they impose are harmful and destructive

The problems mentioned or claimed by these criminals to base themselves on, and with their insane theories are non-existent, unreal, relative, minimal, small, variable and adjustable while that caused by the hospital and neuroleptics is extreme, real, not relative , total, absolute, horror, torture, destruction and chemical, hormonal, bodily, cerebral, nervous.

Some of the "problems" mentioned by criminals or problems that they call "symptom" or "disease" are of a social and/or societal nature, such as the problem in communication or particularities linked to difficulties of a social, societal or communication, this is a CRIME

If the “problems” are of a social, societal nature, therefore medically and objectively they are not “problems” and even less “an illness”, it is obvious since the social and the societal is something subjective and in reality it is not a “problem”, medically and objectively it is not, and for the person it is not a “problem”

The person is interned, they are given neuroleptics by force+ the person has done nothing+ it is done in an arbitrary way, + it is done according to insane theories+ these theories say that the person has “an illness” + among the “symptoms” of “the disease” mentioned, there are a large part of them linked to the particularities of the person in connection with what is social and societal + destroy and deny these particularities in the person by these neuroleptics and thus destroy them him and target him as a person and human being. Neuroleptics block dopamine and thus cut off all sensation, emotion, ideas, thought, personality, own characteristics, mental and bodily well-being. On top of that, neuroleptics torture and cause horrible effects like restlessness and insomnia. BARBARITY. INHUMAN.CRUELTY. CRIME.

If the person had certain problems either of an objective relative nature or otherwise, the criminals did nothing to help the person + the person had nothing + the person does not need neuroleptics+ neuroleptics are destructive + the criminals imposed something that has nothing to do with the person and their reality + they harmed the person + it is beyond harm, it is destruction and torture and horror + they used neuroleptics + neuroleptics have nothing to do with the person and their reality. They are harmful and have destroyed the person.

There is the contradiction between the fact that they speak of “illness and “care” regarding “illness”, with the fact that they claim in nonsense and non-logic to “help” the person.

Note: They do not help the person but destroy them + the “disease” they speak of makes no sense and is nonsense and has no rational basis, does not exist and/or concerns these particularities and/or linked to what is social, societal and therefore subjective.

IMPORTANT: among all the things that exist, they deliberately imposed neuroleptics and not other things, while neuroleptics block dopamine, torture, destroy, horror, intention to harm CRIMLE.BARBARIE. CYNISM.NUISANCE.

Neuroleptics cause the person to enter an unhealthy, destructive and horrible cycle. This cycle is corrupt and pharmaceutical labs profit from it. Labs complicit with criminals, and criminals also their accomplices

The “symptoms” mentioned have no meaning, just as “the illness” has no meaning or rational basis.

The elements mentioned have no meaning and no rational basis; without a real and rational link between them, has nothing to do with what they imposed, and are even of a different nature which makes the thing still senseless (which is already more than senseless) and without foundation (which is already unfounded) e.g.: if the person is not doing relatively well and/or is not eating relatively well, it is neither because of “illness” nor because of “delirium” (that makes no sense obviously), but it is because of very objective reasons. Example 2: the problem of communications, the particularities linked to the person, everything which is of a nature or linked to the societal and subjective social, are not a problem (it is neither really a problem, nor for the person /the fact of considering particularities and/or what is linked to the social, the societal and therefore subjective, as an “illness” constitutes a crime, barbarity, cruelty). Example 3: considering certain repeated ideas as “delusional” and thus considering them as “symptom” and/or “disease”

Act on the person themselves, on their body, on their brain

Act on the person themselves and it is the person who becomes the object of criminal actions and nonsense theories and whatever. This is nonsense, nonsense, NONSENSE. BARBARITY.

Act on the person itself as if it were a piece of furniture, a guinea pig, object of their work and thus the person loses their rights, and things are imposed on them against their will, against their interests, against their property and against their health.

Act on the person themselves, on their body, their brain, and modify their body, their brain, their thoughts, their emotions, their ideas

In addition to modifying the body, the brain, the thoughts, the emotions, the ideas; neuroleptics reduce them, diminish them, cut

them, disrupt them, disrupt them and block them. CRIME. BARBARITY. CRUELTY.

Modifying the brain, the emotions, the thoughts, the ideas of the person by modifying their brain and their body through chemistry, which are neuroleptics, constitutes A CRIME, BARBARIUS, CRUELTY.

On top of that, they destroy, they block, disrupt and torture. CRIME, BARBARISM, CRUELTY

They modify more, reduce more, disrupt more, destroy more, torture more. CRIME, BARBARISM, CRUELTY

They impose in an insane and forced manner and without any sense, foundation or logic, the notion of "delusional ideas", the notion of "disease" and the notion of "symptom" which have no meaning and which are nonsense. What. And thus, by illegitimate force, modify the ideas and the brain of the very person. VIOLATION.CRUELTY. BARBARISM, CRUELTY

It’s the “doctors” who decide when we go out. Worse than prison.

They bring us in for no reason, without motive, without us having done anything wrong. Worse than prison

They force us to take “medication”. Worse than prison

The longer we stay, the more they make us take neuroleptics. The later we go out, the more they force us to take neuroleptics. CRIME

The lie concerning the “judge of liberties” which is only a formality and only validates the decision of the criminal “doctors”.

All the lies about neuroleptics and/or their effects and/or why they give them CRIME, BARBARIUS, CRUELTY. Cynicism

IMPORTANT: The theories of these criminals are more than irrational and more than pseudo-scientific. It's beyond. CRIME.

The same goes for lies about “illness”

The lies regarding “the person is not doing well at the time of internment” when it is false the person is doing well and it is with the neuroleptics that they are not doing well.

The lies and the cynicism and the extremely cynical minimization regarding the destructive effects of neuroleptics. CRIME

The criminals did not impose themselves by brute force, they imposed themselves in other, roundabout, abusive and violent ways

(e.g. lies, disinformation, abuse of trust, manipulation, authoritarian methods, methods unfair, the fact of imposing their insane and baseless and more than irrational theories, abuse on vulnerable people, on precarious people, on people under the influence of neuroleptics, cynicism, harassment) e.g.: the CMP, the hospital of the day, some psychiatrists in private.

If these criminals are told that these neuroleptics have harmful effects and that we do not tolerate them well, or if for ex there is the slightest refusal or resistance, they will do more violence and do worse, they increase the doses and/or or will keep the patient in the hospital longer (this knowing that the hospital and neuroleptics are already harmful.

They give neuroleptics which are harmful and dangerous products in the most irresponsible and jmenfutistic, mediocre and incompetent and sloppy way possible. They prescribe them as if they were sweets to give away, or as if they were selling potatoes, or as if we were in a café where we had to consume something. So, when it comes to the patient's health, the more harmful and dangerous the products are, the more they are something that is not necessary and the patient does not need them anymore. In principle, medication is only given if extremely necessary.

On the psychological side, it is the patient who is supposed to choose and want what is best for his well-being.

V **The truth about psychiatry, hospitals and neuroleptics:**

Some do evil and injustice, barbarity, crime, cruelty and horror; then they cover themselves with “the law allows that”, “it’s legal”. This is the case of psychiatry which takes people by force, which is a crime and above all these products are destructive, harmful, horrible and barbaric and synonymous with torture and destruction. They can commit all this barbarity and cruelty because these corrupt laws allow it.

In the account of the facts, we spoke of the “nurse” or “doctor”, perhaps, who was inhuman, cruel, arrogant, stressed, contemptuous, violent, harsh; his sentence was: “it’s going to be yes all the same, the legal texts allow us to do so”

We are in a pure culture of violation of rights, of “legal”, “institutionalized” crime and “legal” abuse, “legal” barbarism, “legal” attack on freedom.

So they commit crime, torture, barbarity, cruelty, abuse, violation of rights, but they are protected and can do it and society allows them because it is legal.

Note: in the other direction, one can be targeted, judged (even not, sometimes arbitrarily without any trial and this is the case of abusive hospitalizations), poisoned, interned; while we have done nothing wrong, the more they have nothing they can reproach for. This is the case of psychiatric hospitalizations which are abusive and arbitrary, and often by the decision of incompetent people, more than mediocre and beyond, who botch their work when it concerns life, health and human rights. a person ; in psychiatric emergencies (like the CPOA of SAINTE ANNE with Lyna CHAMI). Then, the other person confirms this erroneous diagnosis in the most inhumane and violent manner and beyond incompetent and beyond, botching the person when it comes to their life, health and rights. Then, there is a formality of “judge of freedoms” which only validates without any verification.

Note: they stick their theories of nonsense and whatever on the person, plus stick “disease” (nonsense and whatever)

We have just mentioned a contradiction in the corrupt laws of this system, in addition to mentioning their cruelty, barbarity, inhumane, criminal and corruption.

Some can do evil, injustice, crime, barbarity and cruelty, since it is "legal", since it is still practiced, since it has become "normal", since it is in the practices , since people do it, since there is a pseudo-medicinal and pseudo-scientific (nonsense) authority behind it. It’s like a barbaric custom that has taken hold.

This is the case of criminal psychiatrists who practice forced, abusive and arbitrary hospitalization without consent, forcefully administer harmful neuroleptics, destructive, horrible and torture. And society allows this and even under the guise of “medicine” and “science”. in this society hypocritically and falsely claim to be “a society of freedoms and rights”

Criminals don't even follow their laws that they claim to act according to (or their own laws). And so, the hypocritical society does not even respect its own laws.

In the hypocritical and lying society of the 21st century which claims to be “modern” and “liberal”, says it protects people, their rights and their freedoms, when that is a lie. Generally speaking, corrupt laws

theoretically contain what they call "human rights" "defend fundamental rights and freedoms" and make people believe that they protect people and make people believe that they do not allow not abuse and criminal acts. In fact, we see very clearly that corrupt laws as well as the "justice" that goes with them, allow these abuses and these criminal acts, if it is not that they protect the criminals and the people responsible for these acts, if it is not even worse, it is that these laws gave instructions and directives to these criminals to practice these crimes.

That's generally speaking.

We have the case in which psychiatrists do not discharge the patient from the hospital when the parents request this. However, their own laws contain the fact that when a parent objects to compulsory psychiatric hospitalization, the latter does not take place, as well as the fact that when a parent requests that their son or relative be released from the hospital, he is released immediately. But, criminals don't even respect their own laws that they claim to act according to. There, we have abusive cases and even contrary to their own laws, among these criminals, if it is not that these criminals have acquired a sort of barbaric usage and custom which have become above their laws, in their own laws, if it is not even worse, it is the fact that these corrupt laws contain certain loopholes that criminals know how to use to impose their practices, uses and barbaric customs and thus carry out their crime, injustice, barbarity, cruelty while being covered by the corrupt law.

The “judge of freedoms” is an example of the hypocrisy of this system, these institutions, this society, its laws as well as the “justice” that goes with it. In fact, he only validates the decision of the criminals with whom he is complicit without any verification. In addition to that, this so-called “judge of freedoms”, I believe that he is represented or representative of the hospital, with its “psychiatrists”, “nurses” and the director of the hospital.

The director of the SAINTE ANNE hospital was CHASSAGNOL

The institution is already based on abuse and corruption, and the laws it operates under are already corrupt and unjust; it is therefore more than in their practices and normal and no wonder that they do not respect their own laws.

We are with thugs who are into aggression, violation, confrontation, violence, injustice, violation of rights, doing evil, abuse, oppression,

crime, and then protecting themselves by a corrupt law. We have the sentence of the thug, inhuman, arrogant, violent and cruel “nurse” who said “it’s going to be yes anyway, the laws allow us to do it.” In other words, he wanted to tell me: “We are going to infringe on your rights, and yes, we are criminals, corrupt and thugs and oppressors. But you can't do anything to us since there is a law that allows this, protects us when we do this."

Neuroleptics which are dangerous, harmful, destructive substances and synonymous with torture and horror/and these words are more than very extremely weak and beyond to describe them) are "legal" substances in this corrupt law, as well as this corrupt society and system

“Private psychiatrists, and since neuroleptics are “legal”, they go further than that and give these neuroleptics at will, more to people who do not need them, the more they prescribe very lightly as if it was candy, even worse, they do not inform about the effects of neuroleptics, even more , in some cases, they do not even say the reason why they administered it, And the worst of the worst and the peak of the worst is that they go so far as to lie, manipulate, abuse, exert pressure and/or psychological pressure and all this in addition to misinforming according to the subjectivity and wishes of the “psychiatrist”

While a medication is in principle supposed to be given only in case of necessity and even extreme necessity, or if not at least for the need and/or well-being of the patient; there, we have nothing but "psychiatrists" in private who do more than abuse what is "legal" and prescribe it in an abusive way, already that these "legal" poisons are already an evil and are harmful and destructive (ex MARTINEZ) When they do not practice forced hospitalization and force-feeding of neuroleptics, they have other corrupt and abusive and unfair means to impose their poison

We have the corrupt "law" which allows the forced psychiatric hospitalization of people, which is already a serious crime depriving the person of all freedom, will and choice, in addition the hospitalization has nothing to do with the needs of the patient, neither with his interests nor with his needs and is not for his good or for his well-being. In addition, this hospitalization, which is already more than criminal and abusive (it goes beyond and the words are weak) is decided by the will and the arbitrariness and the subjectivity of these criminals. In addition it is decided based on

things that are more than irrational and beyond and without any basis or meaning and which are nonsense. These things, being pseudo-scientific and pseudo-medicinal, stick to the person and impose on them something which does not exist and which has no meaning or basis which they call “disease”. plus if you're in denial, it's another “symptom”. As neuroleptics are “legal” products, criminals forcefully take them from patients who are already hospitalized. Worse still, they force-feed patients large doses of neuroleptics and don't know what to do with it. Plus, that's all they do. Most of all the things that exist, they just give neuroleptics. More if there is the slightest refusal and/or resistance, they keep longer and/or increase the dose (the NL being already harmful and destructive + there are the pharmaceutical labs which benefit from it + there is the interest of the ''psychiatrists'', the HP and the pharmaceutical labs who manufacture these unhealthy NL against the interest, health and good of the patient (= a whole corrupt system against the patient))

NL and forced hospitalization are already a crime and an injustice, but which are permitted by corrupt and criminal law; criminals do more than abuse and to the maximum of what "the law allows" and which is criminal and unjust and cruel

12) In addition to more than abusing and to the maximum and maximum of the prerogatives given to them within the framework of the legality of NL and forced HP, being already criminal , unjust and illegitimate + the criminals do not even respect their own laws such that there is multiplication and accumulation and addition, in the context of bad faith and obvious intention to harm, of ill-intentioned, disloyal, corrupt, mediocre mistakes and blunders in the worst sense of the term mediocre; they misinform, lie, manipulate, exert pressure and/or psychological pressure, corrupt, unfair, mediocre methods (in the worst sense) (e.g. the episode with CHAMI in which she lies and misinforms my parents+ CHAMI puts pressure so that 'they sign the HDT when in reality it has no reason to exist since no one asked for or wanted this hospitalization+ The violence, the arrogance, the barbarity of the ''nurse'' at the CPOA + The fact that they impose subjects and questions that go into their nonsense when they have no place to be+ ignoring and even not wanting to know why I came nor how nor who took me and just put ''fuzzy request'' and then impose these things directed by them and

according to their insane and inhuman and violent theories and which have no reason to be + GALLET who at one point even refuses to speak with the parents about patient + prevent the parents from visiting without informing the patient in the first days + ESPECIALLY: Not respecting the parents' decision to discharge the patient + ESPECIALLY: The letter summoning my parents to the session of the ''judge of liberties'' which arrives late + The session is 12 days after hospitalization, which is long given the fact that a letter arrives at most in 4 days by choosing the cheapest and therefore slowest service.

The cynicism and denial of CHAMI + the denial and harshness of GALLET+ the cynicism and denial of ZARZOUR + important. The fact that they interpret poorly and/or as they please, to the point of distorting what I said during their questionnaires and interviews (the latter being already managed in a very bad way by them, in addition to be synonymous with violence and pressure + the moral harassment and control used by the CMP and the hospital of the day + the fact of abusing the patient on neuroleptics having lost all will and capacity for action, capacity to independence, capacity for understanding or awareness and degree of perception.

The CMP thus imposes the injection of force (for which the constraint has been theoretically lifted) + the CMP, the hospital and the hospital of the day have imposed their speeches and their insane theories, more than mediocre, which have nothing to see nor place to be, and thus they indirectly threatened the patient by talking to him about "relapse" (which has no meaning or place to be and is nonsense and without foundation like their theories of which comes from, in addition to the fact that all the evil that happens after neuroleptics is because of neuroleptics

The accumulation, multiplication and addition of these facts signify bad faith and an obvious intention to harm + adding to this all the harmful effects of neuroleptics which are destructive, torture and horror + abusive, forced, illegitimate and unjust and which has no reason to be + the cynicism and bad faith that they demonstrate + the theories and the torchenesque and insane pseudo-science without foundation, tail or head, on which they are based + the elements mentioned also clearly

demonstrate the bad faith of these criminals as well as their more than obvious intention to cause harm.

In summary, this last paragraph says to summarize the elements mentioned to demonstrate (which is obvious) bad faith and the intention to harm beyond the more than obvious among the criminals = IMPORTANT

Pharmaceutical labs are complicit in these crimes, in addition to being actors in these crimes, and this more than largely, by being beneficiaries since they receive the profits from the sale of these horrible poisons + they manufacture these poisons, they supply them , they do not inform about the effects of these poisons. In the instructions for the poisons that are neuroleptics (TERCIAN and others similar), they only say a small part of the effects that neuroleptics cause + they are silent about the effect of neuroleptics, + they are silent about the crimes of hospitals + they adhere to insane and baseless theories, and participate in imposing them, such that this more than mediocre pseudo-science has become a source of their commerce and their profit such that they invent diseases to sell “medicines” + such that They make people sick in order to sell “medicines”.

Note: the effects caused by neuroleptics are beyond all measure and comparison, it is horror, torture, destruction and these words are very weak)

Hospitals and neuroleptics target certain people because they "do not conform to society", do not look like society "or different", and they label them as being "sick" and/or call them "disease" and this in the framework of their insane and more than mediocre and institutional theories, that for what is the pseudo-scientific facade for, what is the real hidden reasons, it is in fact for society and to target and destroy these people "no conform to society.

This society, in addition to having laws, a “justice”, and a criminal and corrupt system, it has a truth, a background and a real face that is more than ugly and beyond , more than disgusting and beyond. This society, in addition to being dysfunctional, is in its nature, its substance and its true face, inhuman, jahaliyan*, racist, ugly, disgusting, corrupt, at the peak of the worst mediocrity and beyond , and devoid of the minimum and the least human values and even any value of

being alive, and benevolence, and empathy and love of living beings, and contribution of real value in real added value, and knowing how to live with human beings or even living beings, and exchange, and utility and communication and connection, it is therefore only destruction, horror, nuisance, barbarity, ugliness, disgusting, racism, rejection and destruction. Torture and cruelty towards others for their differences and/or particularities.

Thus, this ugly and corrupt society not only does not provide real value and/or added value, but its contribution is solely and purely negative and destructive. When it comes to human values (even the values of living beings like animals and plants), far from having the slightest minimum, this society is in the complete opposite, such that it approves of evil, unjust, abuse, crime, cruelty, doing a cruel and criminal act and then saying "the law allows us to do it", "it's legal" or "it's normal" or "it's in practice ", target the other for their particularity and/or their difference, barbarism, wickedness, hypocrisy, ugliness, corruption, mediocrity, violence towards the weaker...thus, this society in addition to having acquired its own barbaric custom, it has acquired its system of inverse anti-values.

Note: such a society cannot be compared to animals or any other living thing. The latter deserve all the respect, while this company is very far and beyond reaching this level.

Note: this system with these hospitals and neuroleptics does not only target one type of person. Many types of people from different backgrounds and characters and characteristics have been victims of psychiatric abuse. Technically speaking, these criminals can intern a person in the most arbitrary and abusive way possible. And this “judge of freedoms” is just a puppet in their hands and a simple formality. It only confirms the decision of these criminals without the slightest verification. On top of that, the insane theories on which they are based have no rational basis and are nonsense, such that they can see anything, "an illness" and in anyone "an illness". (ex: he is fat: “disease”, he is thin, “disease”, he talks too much, “disease”, he talks a lot: “disease”, he has such: “disease”, anything: “disease” » ex: you drank your glass of milk at 7:35:31: “sickness”. So, those who are indifferent because they “don't feel concerned” should not be happy at all. this corrupt and

insane and sick and crazy system, can target any person. It's a reality. And technically speaking, it happens that way.

Note: if there is a “madman” or a “sick person”, they are the criminals, “the psychiatrists”, “the nurses”, the pharmaceutical labs, the system, the corrupt laws, “justice” corrupt, as well as this sick society without the slightest human or real value.

Note *jahiliya: Arabic term meaning pre-Islamic times, which was a very dark and barbaric time where customs and practices were very barbaric and ignorant; a time when ignorance and pagan worship and worship reigned

*jahl: Arabic term meaning ignorance in the barbaric and barbaric sense of the term.

This is what we call the fact of interning someone like that for no reason, the fact of giving the destructive, harmful, torturous and horrible neuroleptics the system and the laws of society which allow this, and the society which practices this and targets people for “being non-conforming to society”. We can describe the latter and these facts and these criminals as jahl, jahiliya, cruelty, racism, barbarism, inhuman, corrupt beyond all mediocrity and ugliness, and absence of any human value or real value.

Add to this the role of money (pharmaceutical labs.

Add to this the hypocrisy coming from society, from corrupt laws, from “justice”, from the media, from the pseudo-medical and pseudo-scientific community, from “human rights”

Add to this the fact of attacking for free and for no reason

15) Criminals do their utmost and use the slightest corrupt and devious maneuver with the aim of harming, destroying and torturing the person.

Ex: wanting to keep the patient as long as possible to give them neuroleptics for a longer period of time.

Example: the methods used by CHAMI at CPOA or those of the CMP or those of GALLET

In short, the entire system of hospitals, psychiatry, and neuroleptics is characterized as follows...

We are with pseudo-doctors who give "medicines", not for the good of the patient, but for other reasons which are against and contrary to the good of the patient.

A “doctor” is not supposed to act like this and it makes no sense, logic, reason or basis.

17) NLs kill people by several methods; or slowly, or by NMS (NL malignant syndrome), or by causing s** in these people. So, the deaths caused by NL are horrible and atrocious.

Rq: NL can cause serious damage to the kidneys.

18) NL can cause late-onset damage, such as Tardive Akathesia, Tardive Dyskinesia, and others.

19) NL harms the person in a disproportionate way, and causes them certain health problems, NL can thus cause late problems and problems in the long term.

20) NL causes torture that lasts over a period of time, and not a simple instantaneous torture at a moment, and this in addition to making the person feel slowness over time. This concerns the short term and short-medium term of NL (e.g.: the duration of taking a treatment, or a delayed injection, and even worse the effects in their maximum and/or total phases (ph 0 and 1) last longer than their intended duration.

21) In addition to this turtle which lasts in an interval of time, it causes torture (even if it is of lesser magnitude than the 1st), it lasts in the medium term, the medium-long term, and even the long term. term (e.g.: more moderate and less violent phases begin after a considerable time following the cessation of NL)

22) NLs cause irreversible damage in almost all cases (I believe this is the purpose for which they use NLs)

23) the HP is worse than a prison (entering without reason and without having done anything, the ''doctors'' who decide when we leave so we don't know when, and especially the NL by force)

24) NL is more than worse than prison and beyond (obviously)

25)NL destroys years of a person's life

26)The NL destroy lives.

27) NL is synonymous with absolute horror, real nightmare, torture, destruction, darkness and nihilism

28) HP mistreat people and violate their dignity

29) NL are synonymous with lobotomy, dehumanization and legumization

30) NL are synonymous with barbarism, cruelty and crime

31) NL are synonymous with nihilistic cynicism, and nihilistic cynical indifference, such that nothing has any value in life, and such that evil and good are almost the same in this nihilistic cynicism

Rq: we can speak of cynicism-nihilism-indifference regarding the way in which psychiatrists mistreat the patient + the characteristics of this system and this society and ''justice'' and their corrupt and criminal laws + From the state to which they force the patient to be there through this forced medication and the NL

So this horrible, nightmarish and dark atmosphere that the NL makes you feel, is the image of the corrupt system and society and also the image of these criminal "psychiatrists".

32) NL makes the person feel uneasiness and physical discomfort. For example, the person may feel dizzy and nauseated

33) NLs cause pain in the body. Example: I once felt horrible chest pains that kept me from sleeping.

34) Cutting off, blocking a person's pleasures and sensations is an act beyond all cruelty and extreme torture

35) Cutting off, blocking a person's emotions, sensations is an act beyond all cruelty and extreme torture

36) Cutting off, blocking hormones such as dopamine, serotonin, adrenaline, norepinephrine, melatonin from a person is an act beyond all cruelty and extreme torture

37) Cutting off or blocking a person's sleep is an act beyond all cruelty and extreme torture

38) The violent void that NLs bring a person into through the blocking of dopamine and sensations, is a horrible, nightmarish void beyond all cruelty and extreme torture

39) The fact of modifying a person's brain, their body, their personality, their ideas, their emotions, their particularities; and this by chemo-corporeal means, is an act of violence, an act of cruelty (and beyond), is an unhealthy act, is an act of violation, is an act of destruction, is an act of suppression.

40)The destruction, disruption and disruption of a person's dopaminergic system and neurohormonal system is an act beyond all barbarity, cruelty, crime, horror

41) Damage to the dopaminergic and neurohormonal system causes horrible bodily discomfort beyond all discomfort (e.g. impatience, discomfort)

42) In fact, the pleasures and sensations targeted and blocked by NL also have a physiological and bodily role. Example: libido has links with the physiological and also has a physiological character. Example: dopamine provides great well-being to the body and its absence is synonymous with torture and discomfort that is more than horrible and destructive and beyond. Example 3: Dopamine is linked to the vigor and good health of the body, and its absence causes a slumped and stunned state and a slowed gait. Example 4: Laughter is linked to the face and the pt-t facial muscle. And NL disrupts the physiological mechanisms linked to laughter. Example 5: Thinking can sometimes be tiring in the head. So she needs a healthy body and a healthy brain and dopamine. With NL, one cannot even think or concentrate and when damaged, thinking or concentrating is very and extremely tiring to the skull and body and brain, can cause tingling in the skulls, can prevent sleep or make it difficult, can even cause feelings of nausea and dizziness and fever (as if it is consuming more than the brain can)

So, in addition to the destruction on pleasures, emotions, sensations, particularities; (which is already beyond all cruelty, torture and barbarity and atrocity) 1, NL causes biological, chemical, bodily, physical and physiological and nervous destruction; which is a torture beyond all horror, and an atrocity, horror, cruelty and barbarity 2.

43) In addition to damage at the dopaminergic level, damage at the physiological and bodily level, NL causes damage at the mental level. Thus, the horrible emptiness caused by the NL, the time which passes more slowly as in torture (it already is)

constitute elements of this destruction and mental torture linked to dopaminergic and physiological torture and destruction.

In fact, pleasures and well-being have a necessary role for a person's balance and mental stability, as do emotions. This is obvious that I believe the criminals deny.

44) We can say that the dopaminergic system, as well as the pleasures and well-being and the emotions linked to the latter, are like a kind of cushion or bed for the nervous system, for the body and the person at the physiological level and bodily and at the mental, affective and emotional level.

So the criminals who give NL which have the role of blocking dopamine, destroy the balance of the person at the bodily and physical level and at the mental level. This is evidence that I believe is cynically denied by criminals. And that's on top of the torture, destruction, horror, dark, nightmarish void caused by the NL.
